8. Short description of program
   Global Studies is a multidisciplinary department concerned with the study of global societies, issues and events that shape today’s world. The department offers a BA in a single or combined honors program in four years. We cultivate an environment that fosters high academic achievement, while also preparing students for a range of professional careers after graduation. Students are expected to work through three areas of inquiry: ‘comparative development’, ‘peace and conflict’, and ‘globalization and cultures’. In so doing, they are required to progressively develop their knowledge, proceeding from general concepts and issues into more specific and advanced theories, as well as research methodologies. They are also required to apply a multidisciplinary range of conceptual and analytical tools to think in critical, ethical and innovative ways. Finally, students are also required to develop a degree of second language competency and may choose to complete an experiential component in their program of study by participating in a volunteer placement nationally or abroad.
