Third International Symposium
***Big History and
Global Evolution***
Moscow, September 26–28, 2017

The 1st announcement

On September 25–29, 2017 Lomonosov Moscow State University will hold the International Congress *Globalistics-2017*. In the framework of this congress, the Eurasian Center for Big History & System Forecasting in collaboration with the Faculty of Global Processes at Lomonosov Moscow State University is organizing the 3rd International Symposium ‘Big History & Global Evolution’.

Big History is a relatively new field of study. It is a synthesis of disciplines from the natural sciences, social sciences, and humanities, one that seeks to explore overarching trends that stretch across all existence for 13.8 billion years, – based on the most current scholarly thinking. The definition adopted by the International Big History Association is as follows: ‘Big History is the attempt to understand, in a unified and interdisciplinary way, the history of the cosmos, earth, life and humanity.’

Similar to Big History, the macroevolutionary approach seeks *to develop an inclusive view of the cosmos, earth, life and humanity* by erasing boundaries between disciplines, and that is why we have decided to organize a symposium dealing with Big History and Global Evolution as a unified whole.

The symposium will address a wide range of topics, such as:

- How Big History Works
- Interdisciplinary Development of Big History
- Understanding Big History and Evolution
- Big History Patterns, Trends, & Regularities
- Big History, Global Evolution, and Complexity Studies
- Evolution of the Universe
- Evolution of the Earth
- Evolution of Life
- Social Evolution

Journal of Globalization Studies, Vol. 7 No. 2, November 2016 171–172

- Different Forms of Evolution: Connections and Comparisons
- Globalization within the Context of the Global Evolution
- Forecasting Global Future
- Big History Trends and Phases
- Teaching Big History
